P.O. Box 12107  
Pensacola, FL 32590

Dear Sir:

We have completed the environmental analyses on your product TC-1210 Dust Net. A sample of this product was analyzed by gas chromatography/mass spectrometry (GC/MS) using U.S. Environmental Protection Agency Methods to determine the presence of any targeted toxic compounds.

As used commercially in the diluted state, this product contains toxic compounds at less than detectable levels (two parts per billion). The commercial product, as used by your customers, is more than one thousand times less toxic, for example, than commercial gasoline or diesel fuel.

If you or any of your customers have any further questions, please feel free to contact me.

Sincerely,

LAW ENVIRONMENTAL, INC.

Dale L. Chappelow
